

# DGKC D.G. Khan Cement Company Limited

PSX · DAILY

Close · Mon 22 Jun 2026: **216.59** · **+0.60%** vs prior session (2026-06-19) · price has cleared the resistance zone the analyst was watching, with two upside objectives already reached.

## THE SETUP

The analyst marks a resistance zone that capped price for an extended stretch before the recent push higher. That zone has now been cleared, a move the analyst reads as a validated breakout, reinforced by two upside objectives already reached. The question that follows any breakout: does price keep building toward the next objectives the analyst has set out, or does it stall and give back the zone it just cleared.

## LEVELS IN FOCUS

- Resistance zone cleared now cleared  
 The zone the analyst marks as broken and validated · the level the breakout was measured against
- Where price sits now above the zone  
 Holding above the cleared zone, the analyst's read intact
- Invalidation level below 201.15  
 The level the analyst notes below which the breakout read no longer holds

## WHAT TECHNICIANS WATCH FROM HERE

- ▶ **Continued holding above the cleared zone** keeps the breakout read intact; the analyst's next objectives in focus are **235.65**, then **245.15** and **257.52**.
- ▶ **A close back below 201.15** is the level the analyst flags as where the breakout read would no longer hold.
- ▶ **Follow-through** matters more than the first two objectives already reached: does momentum carry toward the next levels, or does price consolidate beneath them first.

## GENERAL CONCEPT · EDUCATION, NOT A VIEW ON THIS STOCK

### Resistance zone breakout

A resistance zone is a price band where selling has repeatedly capped previous advances. Clearing that band is only the first step: what separates a durable breakout from a false one is whether price **holds** above the former resistance on later sessions, ideally with the zone then acting as a new floor on a pullback. Technicians typically wait for that hold and for follow-through before treating a breakout as confirmed rather than provisional, and define in advance the level whose loss would invalidate the read.
